What You Will Learn

- The theory and history behind the **Ultra Depth®** Process. A new and different mind model, a new suggestibility exercise, modified Elman type inductions, various deepening methods plus, how to deliver a powerful progressive induction to condition your clients for achieving deeper states.
- How to properly transition your client from somnambulism into the Esdaile State and the proper tests to use for testing to be sure that your client is in the Esdaile State.
- How to properly transition your client from the Esdaile State into the Sichort State and the proper tests to use for testing to be sure that your client is in the Sichort State.
- How to use the **Ultra Depth®** Process to guide your clients in achieving a more profound depth for self-healing, the "Sichort State." This is where the body heals automatically six to ten times faster than an individual's own natural healing rate.
- How to use the **Ultra Depth®** Process to help your clients achieve and experience the three levels of anesthesia, that being analgesia, local anesthesia and general anesthesia with one word for use in birthing and/or other minor to major medical procedures.
- How to guide your client to utilize different techniques such as Computer Console, Skywalker & Mind to Mind Healing to name a few.
- How to apply the Retention/Recall Technique with students of any profession to help them improve their exam scores.
- You will learn all the above and much more, as learning this process will help you to achieve results like you never have before.
